

# Xerox® SquareFold® Trimmer Module

## Expand Your Xerox® Light Production Family Finishing Options to Produce a More Professional Look

The SquareFold Trimmer Module enhances the power of your finisher with highly desired features, such as square folding and face trimming to produce high value brochures and booklets. This standalone module can be added on to any existing 4112®/4127® Family, Xerox® 700 Digital Color Press Family or Xerox® Color 550/560 Printer providing greater finishing versatility and increased productivity.

### Features

- Inline square fold and face trim
- SquareFold Trimmer Module attaches neatly to the end of the optional booklet maker finisher
- Easy setup from print server or printer User Interface allows the user to control the amount of trim and thickness of the square fold
- Inline face trimming eliminates paper shingling at the fore edge of booklets
- Accurate face trim settings yield sharp, crisp results
- Booklets can be opened flat without damaging the spine
- Creasing roller technology creases the cover and innermost sheets of the booklet, minimizing image cracking on the fold line

### Benefits

- Gives documents a more professional, finished look
- Produce professional square fold booklets quickly and easily
- Flat booklets are easy to handle, stack, pack, move and store
- Accepts booklets up to 25 folded sheets (or 100 imposed pages) directly from the finisher
- Ideal for inline production of a wide range of applications, such as brochures, catalogs, calendars, photo books, educational and training material and more!

# Xerox® SquareFold® Trimmer Module
